DATE: May 11, 2011

TO: Member Board Administrators and Testing Services

FROM: Tim Miller, P.E., Director of Examination Services

RE: Notice of Future Changes to NCEES Exams and Supporting Material

April 2012 Administration

In the April 2012 exam administration, no changes will be made to NCEES examinations. NCEES will publish revised design standards for the PE Civil–Structural and the 16-hour Structural Engineering exams online 6 months before the April exam.

October 2011 Administration

Changes to the October 2011 exams were first reported to member boards and testing services in October 2010. In the October 2011 exam administration, NCEES will implement changes to the following PE exams.

- The **PE Control Systems** exam has revised specifications.
- The **PE Civil–Geotechnical** afternoon module has revised specifications. Several topic areas have been reorganized. No knowledge areas were added or deleted; they were simply reorganized to provide clarity during item development.
- The specifications for both are posted online at ncees.org.

If you have any questions about these changes or require additional information, please contact me.

C: NCEES Board of Directors
