NCEES seeks volunteers for Structural PE exam PAKS

The National Council of Examiners for Engineering and Surveying (NCEES) is currently seeking licensed structural engineers to participate in a Professional Activities and Knowledge Study, or PAKS, for the Structural Principles and Practice of Engineering (PE) exam. The results of this study will be used to determine the specifications for the exam, which is scheduled to replace the current Structural I and II PE exams by April 2011.

Participants will complete an online survey about the tasks and knowledge required of a licensed structural engineer with 4 to 6 years of experience. The survey can be completed in less than 45 minutes.

“These studies help NCEES ensure its licensing exams remain relevant to current professional practice,” explained Director of Exam Development Tim Miller, P.E. “The value of this PAKS depends on the number of people who participate, so NCEES is eager to get input from as many licensed structural engineers as possible.”

For access to the online survey, please visit www.ncees.org (see News and Updates section). Responses must be received no later than November 10, 2008. If you have any questions, please contact Prometric at 609-895-5234 and leave a voicemail message, or e-mail pnjsurvey@prometric.com.

NCEES is a national nonprofit organization composed of engineering and surveying licensing boards representing all U.S. states, the District of Columbia, Guam, Puerto Rico, and the U.S. Virgin Islands. An accredited standards developer with the American National Standards Institute, NCEES develops, scores, and administers the examinations used for engineering and surveying licensure throughout the United States. NCEES also provides services facilitating professional mobility for licensed engineers and surveyors. Its headquarters is located in Clemson, S.C.
